## PROJECT OBJECTIVES

### The Rotary Foundation approved global grant funding to be used for the following project objectives:

Guatemala is a country located in Central America, its territory extends 108,889 km2, its population is 17,357,886 people, with a population density of 159 people per km2, four cultures coexist which are: Maya, Ladino, Xinca and Garífuna, the country It has twenty-two Mayan languages, one Garífuna language and one Xinca language, this makes it a multicultural country. Guatemala is a country rich in natural resources and its population is characterized by being hardworking, enthusiastic and persevering. Despite the efforts made by its communities, it is classified as an underdeveloped country due to its low rates of human development, malnutrition and illiteracy. It has one of the lowest health and education coverage in the region and its population is in an epidemiological transition of its diseases. On the one hand, they still suffer from communicable pathologies typical of an underdeveloped country and, in recent years, the incidence of chronic degenerative diseases and their complications, as reported in 2021 by the Guatemalan Ministry of Public Health and Social Assistance. This report highlights that communicable diseases of the respiratory tract and the gastrointestinal system were the most frequent in the general population. Diabetes mellitus and arterial hypertension were among the 20 most frequent diseases that affect older adults. The report also indicated that in 2018 breast cancer ranked first in the incidence of gynecological cancer with 1,791 cases per year followed by cervical cancer with 1,503 new cases per year. Cervical cancer ranked first in mortality.

The state health system does not have the capacity to provide comprehensive health care, which involves education, disease prevention and medical care. There is a shortage of medicines and trained personnel as demonstrated in a report by the Guatemalan Health System where it indicates that the Ministry of Health only covers 48% of the population. These problems affect children, youth, women of childbearing age, and adults, causing family members to stop attending school or work. There is a lack of resources for adequate health education and medical care, which worsens their quality of life, social development and decreases productivity. Families who do not find a solution to their needs, may seek private medical attention where they must pay for the consultation, laboratories, imaging studies and treatment. This generates direct spending that affects the economic capacity of the family, thus creating greater poverty and social inequality. Families that cannot pay allow diseases to evolve, which over the years manifest complications that further worsen health. This affects the entire population, but especially the indigenous communities in the interior of the republic, where health and education coverage is lower and of lower quality. This is the case of the municipalities of the department of Sololá, Guatemala, which has one of the lowest human development indices. This is reflected in the department of Sololá, which has a total of 19 municipalities, including Panajachel. From Panajachel derives the village of Patanatic and San Luis, where its population has little access to preventive health services, curative care, and rehabilitation. There is only one departmental reference hospital for the care of more than 467,266 inhabitants that make up the population of Sololá.

Several strategies have been used by the Ministry of Public Health and Social Assistance of Guatemala and other national and international organizations to improve the health conditions of the population, such as: access to immunization with biologicals, deworming, promotion of breastfeeding, water monitoring, adequate treatment of respiratory and diarrheal problems, promoting healthy lifestyles, health care for women and newborns, health education interventions, among others. Some other initiatives have used social clinics where health care is provided to the population, with delivery of medicines and health education. However, it is not enough, since there is a large percentage of the indigenous population that does not have access to these benefits.

That is why the main objective of this grant is to improve access to health for the indigenous families of Patanatic and San Luis, Sololá, Guatemala. This project will provide 3 interventions, the first will be a health education program implemented by children and youth who will act as health promoters. The second intervention will be disease prevention by offering diagnostic studies for cervical and breast cancer, and the third

intervention will be primary medical care for mothers and diabetic and hypertensive patients in the community.

First intervention: It consists of training 18 young people to become community health promoters. The call, application and selection process will be with the help of community leaders, guaranteeing equal treatment to all applicants. The call will be through local leaders where each applicant must apply by means of an application signed by the young person and parents, certificate of the last degree of study, birth certificate and having carefully read the objective of the call. Then the selection process will be carried out which includes review of stationery, conversation with each young person and parents, and weighting of academic grades. Those young people who demonstrate interest in the community, outstanding academic grades, and parents committed to the education of their children will be selected. The young people chosen, accompanied by their parents, will sign an act of commitment, in which they will highlight the importance of their training, but also that of continuing to train more young people after having received their certification. These young people will receive weekly training and will develop new knowledge, values, and skills that will help them generate positive changes in the community, therefore generating a cascade of transformation that will reach their schoolmates, siblings, parents, and other community members. The topics will be diverse from: diarrhea, use of oral solutions, creation of oral solutions, basic first aid, among others. We attach a document with a detailed description of this intervention.

Likewise, a health education campaign will be carried out coordinated by community nurses focused on the 291 students of the Patanatic and San Luis educational centers, on topics such as hand washing and healthy food and lifestyles. The objective is to approach children from schools and institutes to promote health and provide easy-to-understand, applicable and reproducible information to start generating changes in their lifestyle.

Second intervention: It consists of the prevention of diseases by offering diagnostic studies for cervical and breast cancer to 100 women of childbearing age, they will be provided with specialized medical consultation by a gynecologist and screening tests such as Papanicolaou, breast ultrasound and/or mammography, as well as health education in each medical consultation. This program will be coordinated with the community leaders who are in charge of making appointments, as well as different doctors and imaging and cytology services in Sololá and the capital city, such as the National Institute of Cancerology of Guatemala.

Third intervention: It consists of providing primary medical care for 420 mothers of family mothers and 35 diabetic and hypertensive patients in the community. Family mothers will have three medical consultations per year for a total of 1,260 consultations with delivery of basic medicines. Diabetic and hypertensive patients will have constant medical and nutrition consultations, home visits, glucometer tests and delivery of essential medicines. These services will be coordinated with medical specialists, nutritionists and community leaders who will get involved in the process as they have done in the past with other projects carried out in Patanatic and San Luis.

The benefits of this project are to improve the health conditions of the community, improve the health knowledge of community members, timely detection and treatment of communicable and non-communicable diseases, and reduce the consequences of chronic-degenerative diseases. As additional benefits of this project we can mention the decrease in school and work absenteeism We will promote healthy lifestyles and promote social well-being. All these activities will be coordinated by organizations and community leaders, who in the past have been involved in other projects carried out by Rotarians, universities, and national and international organizations. These leaders have extensive experience and a history of honor and respect in the population. They are the result of interventions carried out in the past by organizations in the community that allowed the training of a native doctor and nurses who understand the multi-ethnic diversity of the population and work hard to improve their living conditions.

### Have any of these objectives changed?

No

### Have you made progress toward your project objectives?

Yes

### Describe the progress you've made so far.

18 health promoters have been identified by the Health Center and the community. These health promoters are

trained on preventive health issues and teach other young people how to take care of their health. 72 out of 90 families have been taught the importance of taking care of their health and have come to the Health Center of health care.

291 children have been trained the importance of hygiene, nutrition, healthy lifestyles and basic first aid. These children are also teaching their siblings about hygiene, nutrition, healthy lifestyles and basic first aid.

87 women have attended gynecological consultations for cervical cancer, had a Pap smear test, and were trained what cervical cancer is and how to prevent it. Out of these 87 women, 30 had abnormalities identified in their Pap smear test and 5 women had abnormalities identified on physical examination. All of the women with identified abnormalities are in follow-up now.

81 women attended a gynecological consultation for for breast cancer and were trained what breast cancer is and how to prevent it. 60 women came for an ultrasound and/or a mammography exam. 16 women were found with abnormalities with the breast USG and 5 women were found with abnormalities with mammography exam. All of the women with identified abnormalities are in follow-up now.

390 mothers attended 3 medical consultations in the last year, taught their husbands and children about the importance of medical care, and were diagnosed for pathologies that might need medical treatment. 45 patients were found to have uncontrolled chronic diseases and each one is in follow-up. 32 patients were found with untreated elective surgical pathologies (hernias, cholelithiasis, cholecystitis, hemorrhoids, onychocryptosis, fibroadenomas, lipomas) and none of them are in follow-up. 5 patients were found with vector-borne diseases and all of them are in follow-up. 5 patients were found with malnutrition and all of them are in follow-up.

35 patients received 2 consultations in the last year on diabetes and/or hypertension. 35 patients received 1 consultation on nutrition when diagnosed with diabetes and/or hypertension. 5 patients were prioritized for imaging studies such as renal ultrasound. 35 patients have access to glucometry once a week for year. 35 patients with diabetes and/or hypertension were trained on how to take care of themselves, prevent complications of their disease, and how to educate others on prevention with these diseases. 5 patients were found to have uncontrolled diabetes. 5 patients were found with uncontrolled hypertension. 8 patients were found with complications of diabetes mellitus: retinopathy, neuropathy, diabetic foot, nephropathy. 3 patients were found with complications of hypertension: heart disease, dyspnea. All of these patients are in follow-up now.

## PROJECT IMPLEMENTATION

Your grant application included plans for the following activities. Please report on each of your project activities below. If there were any additional activities during the project, please report each of them by clicking the Add an Activity button at the end of this section.

### 1. Curriculum development for health promoters: includes classes, support material and evaluations.

**Duration**
2 months

| Status | Start Date | Completion Date |
|---|---|---|
| Completed | 09/01/2024 | 28/02/2024 |

### 2. Selection of young health promoters

**Duration**
1 month

| Status | Start Date | Completion Date |
|---|---|---|

| | | |
|---|---|---|
| Completed | 05/02/2024 | 24/02/2024 |

3. Execution of an education program to train health promoters: includes weekly classes, evaluations, interventions in the community

**Duration**
1 year

**Status**
In progress

4. Development of audiovisual material and organization of talks at the Patanatic and San Luis Education Centers: includes didactic material and evaluation

**Duration**
1 month

| Status | Start Date | Completion Date |
|---|---|---|
| Completed | 31/01/2024 | 27/02/2024 |

5. Training for 291 students from the Educational Centers of Patanatic and San Luis

**Duration**
3 months

| Status | Start Date | Completion Date |
|---|---|---|
| Completed | 03/07/2024 | 06/11/2024 |

6. Subpoena to 100 women of childbearing age

**Duration**
1 week

**Status**
In progress

7. Specialized medical consultation for 100 women of childbearing age + health education

**Duration**
1 month

**Status**
In progress

8. Pap smear, breast ultrasound and/or mammography

**Duration**
1 month

| Status | Start Date | Completion Date |
| --- | --- | --- |
| Completed | 23/04/2024 | 26/04/2024 |

9. Evaluation of results of Papanicolaou, breast ultrasound and/or mammography

**Duration**
2 weeks

**Status**
In progress

10. Development of material for health education on cervical and breast cancer

**Duration**
3 weeks

| Status | Start Date | Completion Date |
| --- | --- | --- |
| Completed | 04/03/2024 | 19/06/2024 |

11. Subpoena to 420 mothers for medical consultation

**Duration**
1 month

**Status**
In progress

12. Medical consultation for mothers

**Duration**
1 year

**Status**
In progress

13. Appointment to 35 diabetic / hypertensive patients

**Duration**
1 week

| Status | Start Date | Completion Date |
| --- | --- | --- |
| Completed | 26/02/2024 | 04/04/2024 |

14. Specialized medical consultations for 35 diabetic/hypertensive patients

**Duration**
1 year

**Status**

In progress

15. Consultations with a nutritionist for 35 diabetic/hypertensive patients

**Duration**
2 months

**Status**
In progress

16. Development of material for health education on diabetes mellitus and arterial hypertension

**Duration**
1 month

| Status | Start Date | Completion Date |
|---|---|---|
| Completed | 10/03/2024 | 14/04/2024 |

17. Global grant monitoring by local and international Rotarians

**Duration**
1 year

**Status**
In progress

18. Preparation of reports for local and international Rotary club

**Duration**
2 months

**Status**
In progress

**How many people have directly benefited from the project?**
864

**DISEASE PREVENTION AND TREATMENT**
Impact measures

1. Number of health promoters trained

| Collection method | Frequency | Beneficiaries |
|---|---|---|
| Grant records and reports | Every six months | 1-19 |

RESULTS TO DATE

| Collection Method | Frequency | Beneficiaries |
|---|---|---|
| Grant records and reports | Every six months | 18 |

2. Number of students who will receive training on awareness of preventive health.

| Collection method | Frequency | Beneficiaries |
|---|---|---|
| Focus groups/interviews | Every year | 100-499 |

RESULTS TO DATE

| Collection Method | Frequency | Beneficiaries |
|---|---|---|
| Focus groups/interviews | Every year | 291 |

3. Number of benefited women who receive cervical cancer preventive treatment

| Collection method | Frequency | Beneficiaries |
|---|---|---|
| Grant records and reports | Every year | 100-499 |

RESULTS TO DATE

| Collection Method | Frequency | Beneficiaries |
|---|---|---|
| Grant records and reports | Every year | 87 |

4. Number of beneficiary women who receive preventive treatment for breast cancer

| Collection method | Frequency | Beneficiaries |
|---|---|---|
| Grant records and reports | Every year | 100-499 |

RESULTS TO DATE

| Collection Method | Frequency | Beneficiaries |
|---|---|---|
| Grant records and reports | Every year | 81 |

5. Number of beneficiaries of prevention and control of diabetes and hypertension

| Collection method | Frequency | Beneficiaries |
|---|---|---|
| Grant records and reports | Every year | 20-49 |

RESULTS TO DATE

| Collection Method | Frequency | Beneficiaries |
|---|---|---|
| Grant records and reports | Every year | 35 |

6. Number of families receiving health care on demand.

| Collection method | Frequency | Beneficiaries |
|---|---|---|
| Grant records and reports | Every six months | 1000-2499 |

RESULTS TO DATE

| Collection Method | Frequency | Beneficiaries |
|---|---|---|
| Grant records and reports | Every six months | 390 |

7. Number of individuals reporting better quality of health care services

| Collection method | Frequency | Beneficiaries |
|---|---|---|
| Grant records and reports | Every three months | 100-499 |

RESULTS TO DATE

| Collection Method | Frequency | Beneficiaries |
|---|---|---|
| Grant records and reports | Every three months | 390 |

**Monitoring and evaluation**

Here is the person or organization that was selected to monitor and evaluate impact measures

**Person or organization**

Asociación Integral de Educación y Salud Patanatic

**Qualifications**

The Patanatic Integral Association of Education and Health (AIESP), is a non-profit entity founded in 2014 by community leaders, since then it has coordinated and executed successful projects with national and international organizations, especially with Rotary clubs and districts. Rotarians along with universities, companies, and churches have built a trusting relationship with AIESP. AIESP is directed by Dr. David Garcia. Dr. Garcia received his medical and surgical degree with the help of generous donations from several Rotarians who believed in his ability to one day help his community in Patanatic. During Dr. Garcia's career he has been close to Rotary Clubs involved in this global grant. AIESP was key in the construction and equipping of an Education and Health Center in the community, and is also responsible for the implementation of programs that benefit Patanatic and San Luis. AIESP will be one of the most important allies in the community that will ensure the objectives of this global grant are met and the required national and international standards are met. The legal representative for AIESP, Adela De Tecún, has been a local leader for more than 10 years and has been involved in community benefit projects. She will continue to oversee the project, sign all work contracts and supervise the programs that are developed. She will make sure to have competitive job offers and avoid conflicts of interest with local Rotarians. One of the most outstanding achievements has been the operationalization of

the Patanatic Health and Education Center -CESP- despite the COVID-19 pandemic. This building is where different programs are offered to municipalities in the department of Sololá. These programs are focused on water hygiene and sanitation, community development, and preventive and curative health. Likewise, Dr. Garcia has coordinated the improvement and construction of water tanks with filter systems, access to home improvements, orchards, animal husbandry, preventive health campaigns with national and foreign doctors, educational scholarships for low-income children, and achieving the graduation of a doctor and surgeon, two nurses, two speech and language hearing therapy technicians and several young people from primary, secondary and diversified levels.

### Has this person or organization changed?

No

# Participants

## SPONSOR PARTICIPATION

### What roles and responsibilities did host sponsor members have?

1) Receive project funds, keep records of all financial transactions, monthly bank balance, documentation, purchase checks, thank you letters, and photos.
2) Coordinate with the Topeka South Rotary Club during the implementation of the GG.
3) Coordinate with local leaders, school principals, and families during the implementation of the GG in Patanatic and San Luis, participating in training, follow-up, and visits to educational centers and community health.
4 ) Collaborate with international and national Rotarians who will participate in the implementation of the GG during the implementation of health promotion, disease prevention, and health care programs.
5) Prepare interim and final reports for Clubs, Districts, and Rotary International.

### What roles and responsibilities did international sponsor members have?

1) Provide any technical support or financial assistance needed/requested by the Rotary Club of Lake Atitlán and the Patanatic Integral Association of Education and Health
2) Maintain communication with the Rotary Club of Atitlán and the Patanatic Integral Association of Education and Health regarding the implementation of health promotion, disease prevention, and health care programs.
3) Maintain duplicate documentation of all purchases, bank statements, photos, and correspondence.
4) Encourage members of your club and other clubs to travel to Guatemala to participate in the implementation of the Global Grant.
5) Assist in the preparation of interim and final reports for the Districts and Rotary International.

## PARTNERS *(OPTIONAL)*

Add any Rotary clubs or districts that were involved in this project, other than the host and international sponsors or financial contributors.

| No. | Type | Club name or district number |
|---|---|---|

## COOPERATING ORGANIZATIONS

### 1. Asociación Integral de Educación y Salud Patanatic

Km 113.5 Old Road to Panajachel
Patanatic Sololá
Guatemala

https://aiespguatemala.wixsite.com/sitioweb

### Describe how cooperating organizations participated in the project.

The Patanatic Integral Education and Health Association made sure to request competitive and quality services, products and offers, avoiding conflicts of interest with local Rotarians. It was also in charge of receiving the global grant funds and having the financial report, preparing the accounting records for each fund executed and helping to prepare the reports for the local and international Rotary Club.

# Project Expenditures

### Expense summary

| Category | Budget (GTQ) | Expenses (GTQ) | Variances (GTQ) |
|---|---|---|---|
| Equipment | 2360.00 | 2369.95 | (9.95) |
| Operations | 17964.85 | 0 | 17964.85 |
| Personnel | 247070.00 | 216542.25 | 30527.75 |
| Supplies | 94230.00 | 86973.50 | 7256.50 |
| Training | 15000.00 | 10000.00 | 5000.00 |
| **Totals:** | **376624.85** | **315885.70** | **60739.15** |

### Did your project have any unexpected or unusually large variances?

Yes

### Please briefly describe the circumstances for the variance.

Initially, a budget of Q. 376,624.86 was projected, however, Q. 340,710.36 was received, which affected our budget with Q 35,914.49

# Financial Details

## PROJECT BANK STATEMENTS

**Upload bank statements from the project bank account to show all project-related transactions, including deposits and withdrawals. In addition to the bank statements, you can also upload a financial ledger. For scholarships, please attach receipts for any expenses over $75.**

**Supporting Documents**

- atitlan_rotary_acc.zip

## FINANCIAL MANAGEMENT

**Who is in charge of the project's financial management?**
This is done by the Patanatic Integral Education and Health Association in coordination with the community leaders directly involved in this project.

**Please describe the project's financial management, including record keeping, inventory, payment authorizations, and conversion of funds.**
The project fund was deposited into the account of the host club Lake Atitlan, which received a request for a transfer of funds from the Patanatic Integral Association for Education and Health to begin the development of the project. The request for funds was made according to the initial description of the project. Upon receiving the funds, the Association issued a donation receipt to the Rotary club. Subsequently, quotes were made for products and services and, upon determining the best offer, the funds were disbursed for said good or product. The Association kept an accounting record in an Excel sheet with all the transactions carried out, which includes the deposit received, the expenses incurred, the receipt and/or invoice number, and the balance of funds. In this way, the report was facilitated for the host and international Rotary Club.

For the conversion of funds from dollars to quetzals, the exchange rate of the day published by the Banking System of Guatemala was applied.

**Were there any challenges in managing the project funds?**
No

## PROJECT INCOME

**Did your project generate any income through sales, interest, or other sources?**
No

## YOUR AUTHORIZATIONS

### Primary contact

By authorizing this report, I confirm that, to the best of my knowledge, these grant funds were spent according to Foundation guidelines and that all of the information contained in this report is true and accurate. Original receipts for all expenses incurred will be kept on file for at least five years, or longer if required by local law, in case they are needed for auditing purposes.

Grant reports and supporting documentation should not include personal data (name, contact information, age/date of birth, health/medical data, or other identifying information) or images of anyone who is not authorizing this report unless (a) it is requested by the Foundation and (b) written consent of the individual (or their parent or legal guardian) is provided to the Foundation. If such personal data is inappropriately included, it may cause delays in the grant process while the Foundation complies with Rotary's Privacy Policy.

I also understand that all photographs, video and other media submitted with this report will become the property of Rotary International and will not be returned. I represent and warrant that I own all rights in the photographs, video and other media, including copyrights, and that all persons (or their parents if they are minors or lack legal capacity) appearing in such photographs, videos and other media have given me their unrestricted written consent to license use of their images/likenesses to Rotary International. I hereby grant Rotary International and The Rotary Foundation (collectively, "Rotary") a royalty-free, worldwide, perpetual, irrevocable license and right to use, publish, print, reproduce, edit, broadcast, webcast, display, distribute, modify, create derivative works from, sublicense and publicly perform, the photographs, video and/or media now or at any time in the future, in Rotary International publications and materials, and for promotional purposes in any form, medium or technology now known or later developed. I represent, warrant and agree that Rotary shall have the universal right to license use of your photograph, video, and/or other media in order to promote Rotary programs, including grants and scholarships without liability.
